## Winter Driving

Rapid changes in elevation and weather can make highway conditions in B.C. unpredictable during the winter. Most B.C. highways have high mountain passes where you are likely to encounter winter weather starting in October. You may start a trip in sunshine but face stretches of slush, ice, heavy snowfall, compact snow or [avalanches](#) along the way.

It is the responsibility of the operator of any vehicle to understand the conditions on the roads they regularly drive and equip their vehicle for those conditions to ensure their own safety and the safety of others on the road. [DriveBC](#) is an excellent source for highway conditions and weather forecasts.

### Winter Tires & Chains

Sections of highways requiring winter tires or chains onboard are marked with roadside signs. Should you go [beyond the signs](#) without the proper equipment you may be turned around by [RCMP, CVSE or another policing agency](#), and be subject to a fine. Drivers must obey winter tire and chain signs throughout the province from October 1 to March 31. For select highways, including mountain passes and rural routes in high snowfall areas, the date is extended until April 30 to account for early-spring snowfall.

### Winter Driving Tips

The best way to stay safe under extreme conditions is to avoid driving until the weather improves. If you are driving - make sure your vehicle is winter ready - always carry an [emergency kit](#) and have clothing available appropriate to the weather that you will experience outside your vehicle.
